

How upload an RX file into SOILMAP & Dispatch

Why do I need to this?

You may need to do this if you have files from an outside company that made the VRT file or the automated SOILMAP upload to dispatch failed.

You can do this from 3 places within SOILMAP & Dispatch.

SOILMAP Blendsheet

From the SOILMAP blendsheet push the External RX file button

You may enter a description or a source for file

Select the source format

Browse for the Zip file. *File must be in .Zip folder*

Upload

Dispatch Website Option 1

Hover over the tractor icon

Select Upload Prescription

Select the machine

Browse for the Zip file. *File must be in .Zip folder*

You may enter a description or a source for file

Select a blendsheet

Upload Prescription

Upload Prescription to Machine - From This Computer

Dispatch Website Option 2

When assigning a blendsheet to a machine you will see the external Rx button.

Select External Rx and follow the same steps as above.
