

In-Cab App Message – ApplicatorApp_v2 has stopped working

Error message

Are you seeing this error message on your In-Cab App?

Resolution

1. Right click or hold your finger on the SOILMAP In-Cab shortcut
2. Selection Open file location
3. Right click or hold your finger on the right side and select Group by → Type
4. Scroll down and look under the heading CONIFIG File
5. Right click or hold your finder on AppliatorApp_v2.exe.config
6. Open with Notepad
7. Scroll down to the bottom of Notepad
8. Enter a new line after </assemblyBinding>
9. Copy this into the new line: `<legacyUnhandledExceptionPolicy enabled="1"/>`
10. Save & Exit
11. Success!!

Now you may log back into the In-Cab App with your username & Password
